Education

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
Integrated B.Tech + M.Tech, IT	ABV-IIITM, Gwalior (INI)	8.87 CGPA (9.27 SGPA)	2023 – 2028
Senior Secondary (Class XII)	C.B.S.E Board	96.67%	2023
Secondary (Class X)	C.B.S.E Board	95.8%	2021

JEE Mains 99th percentile | Top 5 in batch | MCM Scholarship recipient | Verified Gradesheets

Experience

- **Open Source Contributor** — **Aug 2025 – Present**
  omegaUp — Online judge & education platform (Vue 2, TypeScript, PHP 8.1, MySQL 8.0) — *Remote*
  - Merged **21 pull requests** into the main repository; contributing 4–5 hours daily. Stack: Docker, Kubernetes, Redis, Webpack, Jest, Cypress, PHPUnit.
  - Built GitHub OAuth sign-in end-to-end — PHP controller, DB migration, Vue components, TS types (25 files, +713 lines).
  - Shipped human-readable contest dates across Vue, TypeScript & i18n with zero regressions (15 files, +544 lines).
  - Improved custom test-case discoverability in the Bootstrap-dense arena interface (14 files).
  - Created reusable 3D hover badge component with composable CSS animations (Vue + SCSS).
  - Refactored navbar dropdown behavior integrating Bootstrap 4 lifecycle with Vue reactivity.
  - Actively mentoring fellow contributors; coordinating with maintainer @pabo99.
- **Research Intern** — **Nov 2025 – Present**
  Under Dr. Roshni Chakraborty, ABV-IIITM Gwalior — *Gwalior, India*
  - Investigating expert identification from StockTwits social-media data (2008–2022) to improve stock trend prediction.
  - Building ML pipeline for sentiment accuracy analysis and expert signal extraction using NLP and Transformers.
  - Enriching user metadata via targeted API-based scraping for behavioral pattern analysis.
- **Project Intern** — **May 2024 – Aug 2024**
  Advanced Materials Research Lab, ABV-IIITM — *Gwalior, India*
  - Engineered a multi-sensor IoT device (Arduino) to monitor cattle health metrics (temperature, heart rate, ambient gas).
  - Built data pipeline transmitting sensor readings via Wi-Fi/Bluetooth to Firebase & Google Sheets for real-time remote monitoring.
  - Created proof-of-concept mobile app for data visualization and device management. *Patent being filed.*

Projects

- **GitNaut x Portfolio** *(React, TypeScript, Vite, Node.js, Tailwind CSS)* — Jan 2026 – Mar 2026 | |
  - Terminal-first GitHub intelligence desk — repo summaries, language breakdowns, contributor snapshots, PR analysis with SVG charts, file tree inspection, and interactive themes.
  - Features matrix-rain animation, sound effects, autocomplete, and full keyboard-driven UX.
- **ChurnAware — Sentiment-Aware Churn Prediction** *(Python, Scikit-learn, Pandas, Streamlit)* — Sep 2025 – Nov 2025 |
  - Implemented RFM (Recency-Frequency-Monetary) segmentation pipeline on Blinkit e-grocery dataset to identify at-risk customers.
  - Built sentiment-aware churn prediction model combining customer behavioral signals with review sentiment analysis.
- **Einstein Contact Manager** *(Next.js 15, FastAPI, PostgreSQL, Groq AI, Gemini OCR)* — Nov 2024 – Feb 2025 | |
  - Full-stack AI contact manager with NL search, smart dedup & merge, business-card OCR, Google Contacts sync, CSV/vCard import-export, analytics dashboard, and neobrutalism UI.
  - Integrated Groq LLaMA 3.3-70B for natural-language search and Gemini 2.5 Flash for photo-to-contact OCR.
- **ApnaSafar (Webkriti Contest Winner)** *(MERN Stack (MongoDB, Express.js, React, Node.js))* — May 2024 – Aug 2024 | |
  - Awarded 1st place in Webkriti, a 3-month full-stack development contest; built a comprehensive travel booking platform from scratch.
  - Implemented user authentication, ticket/hotel search, seat selection, email notifications, and downloadable PDF tickets.

Technical Skills

Languages	C++, Python, JavaScript, TypeScript, PHP 8.1, Java, C, Kotlin, HTML/CSS, SCSS
Frontend	Vue.js 2, React, Next.js 15, Tailwind CSS, Bootstrap Vue, Monaco Editor, SCSS
Backend	PHP (MVC + Twig), Node.js, Express.js, FastAPI, Django
Databases	MySQL 8.0, MongoDB, PostgreSQL, Firebase, Redis
ML / Data	Scikit-learn, Pandas, NLP, Transformers, Streamlit, RFM Modelling
DevOps / Tools	Docker, Kubernetes, Git, Linux, Webpack 5, RabbitMQ, New Relic, Arduino
Testing	Jest, Cypress, PHPUnit

Key Courses Taken

Graph Theory & Discrete Structures **(A)** | Database Systems **(A)** | Computer Organization & Architecture **(A)** | Computer Networks & Data Communications **(A)** | Hardware Workshop **(A)** | Object-Oriented Programming **(A)** | Design & Analysis of Algorithms | Trustworthy AI

Achievements

- **GATE 2026** Qualified — result awaiting; cleared cutoff.
- **Knight Badge, LeetCode** — Rating **1,858**; 500+ problems solved across platforms (400+ on LeetCode alone).
- **Pull Shark ×2, Pair Extraordinaire, Quickdraw** — GitHub achievements earned through omegaUp open-source contributions.
- **SIH 2025 Participant:** Developed solutions for real-world problems at the Smart India Hackathon.
- **Webkriti Hackathon Winner (2024):** 1st place in a 3-month full-stack web development competition at IIITM Gwalior.
- **Merit-cum-Means (MCM) Scholarship:** Awarded by IIITM Gwalior for academic excellence.
- **AlgoUniversity ICPC Camp:** Qualified to Stage 2 of the selection for the competitive programming camp.
- **Reliance Foundation Undergraduate Scholar (2023):** Merit-based scholarship for academic excellence.
- **National Children's Science Congress Winner (2017):** 1st in India (KVS) for Drought Management System project.
