Terminal Portfolio

Education

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
Integrated B.Tech + M.Tech, IT	ABV-IIITM, Gwalior	8.78 CGPA (9.05 SGPA)	2023 - 2028
Senior Secondary (Class XII)	C.B.S.E Board	96.67%	2023
Secondary (Class X)	C.B.S.E Board	95.8%	2021

Experience

- **Project Intern** **May 2024 - Aug 2024**
  Advanced Materials Research Lab, ABV-IIITM *Gwalior, India*
  - Engineered a multi-sensor IoT device using Arduino to monitor key cattle health metrics (temperature, heart rate, ambient gas levels) for early disease detection.
  - Developed a data pipeline to transmit sensor readings via Wi-Fi modules to Firebase and Google Sheets, enabling real-time, remote livestock monitoring.
  - Created a proof-of-concept mobile application for direct data visualization and device management via Bluetooth communication.

Projects

- **ApnaSafar (Webkriti Contest Winner)** *(MERN Stack (MongoDB, Express.js, React, Node.js))* Live Demo
  - Awarded 1st place in Webkriti, a 3-month full-stack development contest; developed a comprehensive travel booking platform from scratch.
  - Implemented user authentication, ticket/hotel search, seat selection, email notifications, and downloadable PDF tickets.
- **ShodhCP - Contests Manager** *(MERN Stack, REST APIs)* Code
  - Built a web application to aggregate and manage competitive programming contests from platforms like Codeforces, LeetCode, and CodeChef.
  - Designed features for users to track upcoming contests, set reminders, and view platform-specific statistics via API integrations.
- **Einstein Terminal - AI Contact Manager** *(Python, Google Contacts API, AI/ML Libraries)* Code
  - Created an intelligent terminal-based tool to manage personal contacts with natural language commands.
  - Integrated the Google Contacts API for seamless synchronization and utilized AI for parsing user input and intent.

Technical Skills

Languages	C++, Python, JavaScript, TypeScript, Java, C, HTML/CSS, Kotlin
Frontend	React, Next.js, Tailwind CSS, HTML5, CSS3
Backend	Node.js, Express.js, Django, Prisma
Databases	MongoDB, MySQL, Firebase
Developer Tools	Git, GitHub, VS Code, Linux, Bash, Docker, Figma, Arduino, Notion

Key Courses Taken

- **Design Analysis of Algorithms**: **Codeforces Auto-Submitter**
  - *Algorithmic paradigms: Divide and Conquer, Greedy, Dynamic Programming.*
  - *Complexity analysis: Asymptotic notations, Recurrence Relations, NP-Hardness.*
- **Computer Graphics**: **Live ASCII Art Viewer** | **2D Grid Drawing Tool**
  - *2D/3D transformations, scan conversion algorithms (line, circle), clipping.*
  - *Developed a real-time ASCII art generator from camera feed a terminal-based shape drawing tool.*
- **Trustworthy AI**: **3D Simulation**
  - *Core concepts of fairness, explainability (XAI), and robustness in AI systems.*
  - *Built an online 3D simulation of a vacuum cleaner applying pathfinding algorithms.*

Academic Achievements

- **Reliance Foundation Undergraduate Scholar (2023):** Awarded a prestigious, merit-based scholarship for academic excellence.
- **National Children's Science Congress Winner (2017):** Secured 1st position in India (KVS) for a project on a Drought Management System.
- **Webkriti Hackathon Winner (2024):** Achieved 1st place in a 3-month long full-stack web development competition.
- **AlgoUniversity ICPC Camp:** Qualified to Stage 2 of the selection process for the competitive programming camp.
- **SIH 2025 Participant:** Actively participated in the Smart India Hackathon, developing solutions for real-world problems.
